MESSAGE FROM THE VICE-CHANCELLOR

It is heartening to know that Multanimal Modi College, Modinagar is bringing out its quarterly Newsletter. It is a commendable effort aimed at harnessing creative skills of the students by providing them a forum to express their views on various important issues. I wish the Newsletter go a long way in accomplishing the goal of value education.

I convey my good wishes and felicitations to the Principal, members of faculty and students for bringing out such a prestigious publication.

N.K. Taneja

HEALTH CORNER

SANKHPUSPI

Botanical Name- *Clitoria ternatea* Family- FABACEAE, Hindi-Koyal, Asphota, Girikarni, Sankhapuspi, Sephanda etc.

It is a perennial climber containing pinnate 5-9 foliolate leaves. The flowers are showy, blue or white, Fruits are pods, linear, compressed containing 6-10 seeds. The plant is distributed almost throughout India, wild or cultivated as well as other parts of world as Egypt, Syria, Mesopotamia, Iraq, Persia, Arabia, Afghanistan etc.

It alleviates swelling and pain and has haemostatic action, hence it is used in piles specially bleeding piles. Piles are cleaned with the decoction and the paste of the whole plant is applied over it. Leaf juice is used as nasal drops in headache. Oil boiled with dhamasa is used for massage in rheumatoid arthritis.

Decoction is used for gargling in stomatitis and for cleaning wounds. It prevents pus formation. It has a tranquillizing effect on the brain hence it is used in symptoms like syncope, vertigo and brain weakness.

It is also an antiemetic, antidyspeptic, mild-laxative and cholagogue. Therefore, it is used in emesis. Dyspepsia, constipation jaundice and piles. It is also used in healing of ulcer. Being haemostatic and blood purifier, it is useful in haemorrhagic disorders and vatarakta. Hot infusion of dhamasa is given to prevent small pox. It is used in common cold, cough, asthma as it acts as an expectorant and reduces the irritation of respiratory organs.

—Dr. Arun Kumar Maurya
